

Tobii Dynavox Solutions for Early Communicators

Course Description: Join us for a full day of learning as we explore topics to help early communicators be more successful in the areas of learning, language and literacy.

Morning Session: You will learn how to help the children that you work with communicate with core vocabulary, and how to implement Snap + Core First as a tool to do so. Also, Justin Bytautas, Key Account Manager for North America, from Boardmaker will teach you how to use Boardmaker Online to further enhance learning opportunities in the classroom and beyond!

Lunch will be provided – stay and play with Tobii Dynavox devices, software and Boardmaker Online tools

Afternoon Session: Do you work with children who require eye gaze technology? No problem, we've got you covered! You will see how we can demystify eye gaze technology and help teach it as a way for children to engage in play and develop language and communication skills.

This workshop will be offered for 6 Clinical Maintenance Hours (CMH)

<p><u>Location</u> Thames Valley Children's Center 779 Base Line Road East London, Ontario N6C 5Y6</p>	<p><u>Date and Time</u> Thursday November 15th, 2018 9:00-4:00</p>

Presenter: Lindsey Frohn, M.S., CCC-SLP. Lindsey has worked in a rehabilitation hospital for over 6 years as a pediatric speech-language pathologist. While working with a wide variety of diagnoses and disorders, she developed a passion for AAC to increase her patients' abilities to communicate successfully. She is presently a member of the Learning Services Team where she develops and conducts internal and customer trainings, creates implementation resources, and presents at conferences about AAC topics.

Financial Disclosure: Lindsey is a full-time employee of Tobii-Dynavox.

Non-financial Disclosure: Lindsey has no relevant non-financial relationships.

Content Disclosure: Because of the unique characteristics of our product, this presentation will focus exclusively on the Tobii Dynavox product line and will not include information about other communication or educational products.
