In the first of this two-part workshop, parents and caregivers will learn about the ABC's of behaviour.

In Part 1, we identify behaviours that interfere with everyday activities. We will explore how parents can gather information about the interfering behaviour and develop prevention strategies. Please note: that we cannot address more severe interfering behaviours such as self-injurious behaviour (e.g. hits own head) or aggression that causes physical harm to others. Services and supports offered in partnership with Children's Treatment Centre of Chatham-Kent and John McGivney Children's Treatment Centre.
