

Activity Suggestions

for babies who prefer to turn their head to the LEFT:

- Place mobiles, toys, etc in the middle above your baby or on the right side to encourage midline head position and turning to the right.
- Carry your baby so they turn their head to the right to see ahead.
- Place your baby in the crib/on the change table so they look to the right to see you.
- Hold baby on your chest with their head turned to the right.
- Place baby on their right side to play for short periods, with supervision.
- Place all interesting toys/objects/people on the right side.
- Have your baby lie on their tummy with their head turned to the right, with supervision.
- Encourage tummy time in a variety of ways – on the floor, over a roll, in your arms, on your chest.

- If you are concerned about your baby's head/neck position and would like a physiotherapy assessment, contact Thames Valley Children's Centre intake at 519-685-8716.

We help kids be kids!

Activity Suggestions to promote right head turn
