**Parking:** Free

Do you have a little one at home who you want to communicate with? This group is designed to increase your child's communication skills. Children will work on copying others, understanding directions from an adult, asking for things, labeling things they see, and filling in common songs and phrases. We will build on your child's existing communication skills, or start from scratch! Children will experience circle time, crafts and activities, with natural opportunities to communicate.

The first session is only for caregivers (children do not attend this session). You will set goals for your child with a Behaviour Clinician. You are not required to attend any of the other sessions (although you are welcome to stay!).

This group is overseen by a Behaviour Clinician, who is a Board Certified Behavior Analyst® (BCBA®). The Behaviour Clinician writes a treatment plan specifically for your child's needs. A report of your child's progress is provided at the end of the group.
