Imagine you asked your child to put on her shoes, and she did! What if your child set the table the first time you asked? Cooperation is an important skill your child will need in order to be successful at school, at home, and with friends. This group will help your child be more cooperative when he/she is asked to do something. Using Applied Behaviour Analysis (ABA), our Board Certified Behaviour Analysts® and Instructor Therapists will work with your child to improve his/her cooperation skills, all while having fun!
