Would you like to hear that your child is participating well at school? Does your child need more practice to help him or her be more successful in school?

We will support your child to participate in activities that are common in a typical school classroom. Whether your child is getting ready to start school, or is already in kindergarten or grade one, our Instructor Therapists will help him/her focus on improving cooperation and independence.

In our classroom setting, your child will work on goals such as: communication and play skills, participating in small groups, transitioning between activities, following school routines, and daily living skills needed in a school day.
